Dell Inc., as the equipment's responsible party for electromagnetic compatibility (EMC) regulatory compliance for Canada, declares that the Information Technology Equipment (ITE) described by the object of this suppliers declaration or conformity complies with:

- ISED Inference-Causing Equipment Standard ICES-003, Issue 7

We attest that we have verified that compliance has been demonstrated and the results documented in an EMC test report and that the report does clearly state compliance with the above ICES-003 standard and details which test method was employed to determine compliance.

OBJECT OF THE SUPPLIERS DECLARATION OF CONFORMITY	
Type of Equipment.....	Server
Regulatory Model.....	E75S
Regulatory Type or Reference Number.....	E75S001
Trade/Brand Name (make).....	DELL EMC

This equipment has been tested and found to comply with the limits for a **Class A** digital device for both conducted and radiated emissions, pursuant to ICES-003 Issue 7. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial non-residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause harmful interference with radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. There is no guarantee that interference will not occur in a particular installation.

This equipment was tested in a typical configuration.

This equipment's unique regulatory compliance identification is provided by the Regulatory Model and/or Regulatory Type. These regulatory compliance identification markings are on the regulatory label affixed to your equipment and should not be confused with marketing name or model of the equipment. To facilitate positive identification, request for regulatory compliance information for this equipment should include the Regulatory Model and/or Regulatory Type. This equipment may be marketed under one or more of the makes and/or marketing names/models of the wholly owned Dell Inc. subsidiaries and brands.
